- United States Navy Veteran
- ☒ Pyrolysis Thermal Processing / Retort Operation Certified
- ☒ Member Healthcare Waste Institute
HWI / NWRA

Profile | Responsibilities

Tommy currently serves as COO of Monarch Waste Technologies with a goal to help in the expansion of MWTs technology in providing a non-incineration alternative for the clean destruction of medical and hazardous waste.

Tommy oversees the project management aspects of each facility to include supervision and coordination with installation partners, vendors and sub-contractors to ensure readiness by executing all efforts necessary for the required shakedown and commissioning steps for each facility. Once a facility is fully commissioned, Tommy oversees the recruiting, hiring and training of the plant manager and staff to ensure all staff members are fully trained on the process and policies of the company. This includes the system and facility preventative maintenance programs, company's Health & Safety Plan, required record keeping for state permit compliance, inspection records and logs as well as remote training activities to certify qualified operators for the Pyrolysis system. Having been intimately involved with the requirements in successfully commissioning and operating the Fargo facility, Tommy has become proficient in all aspects of MWTs technology to meet required specifications of each installation.

Experience

Six years of Pyrolysis waste destruction technology and industry expertise:

- Served as Project Manager to design, fabricate, install, and successfully operate the Fargo, ND Pyrolysis Plant
- Supervised shakedown and commissioning of Fargo Plant including all unscripted design modification system improvements
- Instituted all Pyrolysis system and facility preventative maintenance programs
- Drafted and maintained all required regulatory, permit, inspection records and plans ensuring compliance with all regulatory bodies
- Created training programs and tutorials demonstrating proper waste management and system operations
- Recruited, hired, and trained all employees
- Wrote the company's Pyrolysis PLC Operations Training Manual
- Generated positive EBITDA of 40%+ of total revenue for five consecutive months in first year of Fargo Plant operations
